DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Hidetsugu.

Hidetsugu teaches an oxygen-generating composition comprising iron powder (fuel), sodium chlorate (oxygen source), diatomaceous earth (binder) and strontium peroxide (catalyst, chlorine suppressant, rate reaction modifier and secondary oxygen source) (see abstract in its entirety).

Accordingly, Hidetsugu teaching all the material limitations of the claims, anticipates the claims.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1714

4. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by WO9743210.

WO teaches an oxygen-generating composition comprising 0.1-15% of copper oxide and/or nickel oxide as a catalyst; an alkali metal chlorate or perchlorate oxygen generating source, 0.1 to about 5% strontium peroxide as a chlorine suppressant and rate reaction modifier, 0.5-15% of a metal powder, such as iron, tin, etc. as the fuel and up to 5% of a binder (glass powder, glass fiber) (see abstract; page 4, lines 25-31; page 5, lines 3-30; page 6, lines 14-25; page 7, lines 3-9; Examples).

Accordingly, WO teaching all the material limitations of the claims, anticipates the claims.

5. The prior art made of record and not relied upon is cited for teaching oxygen-generating compositions and is considered pertinent to applicant's disclosure.
